Software developer (m/f/d)

Description

You will support our team in the maintenance, support, and further development of our ERP system and SQL database, as well as program microservices.

We are looking for active reinforcement for our team at our Kiel location starting immediately—someone who is excited about challenging IT projects, personal responsibility, and individual development.

Your responsibilities

- Support for the maintenance & support of our legacy system (Application Factory)
- Maintenance, support, and further development of SQL databases
- Further development of the Application Factory under .NET
- Programming of microservices

Your profile

- High level of commitment and a willingness to learn new things and take on responsibility
- Independent and autonomous work
- Analytical thinking
- Team player skills
- Excellent written and spoken knowledge of both German and English

Your qualifications

- Excellent knowledge of at least one object-oriented programming language
- Good knowledge of SQL and RDBMS systems
- Experience with Git
- Experience with .NET
- Experience with microservices
