## Working student backend (m/f/d)

### Description

You will support our team and our clients throughout the entire software process using Azure DevOps, always keeping our clients' security in mind.

We are looking for active reinforcement for our team at our Kiel location starting immediately—someone who is excited about challenging IT projects, personal responsibility, and individual development. Are you currently studying and want to put your theoretical knowledge into practice while gaining hands-on experience with real-world IT projects? Then joining us as a working student is the perfect fit for you!

### Your responsibilities

- Scrum process participation
- Development of services in C#
- Development of complex build pipelines (CI)
- Creation of Docker containers in the cloud
- Versioning of our systems
- Development of release pipelines (CD)
- Operation of the solutions on Kubernetes and in the cloud

### Your profile

- Ongoing studies, ideally in the field of (business) informatics, computer science, or mathematics at a university or university of applied sciences (FH) in northern Germany
- Commitment and curiosity
- Analytical thinking
- Ability to analyze and describe complex business matters
- Team player skills
- Good written and spoken knowledge of both German and English

### Your qualifications

- Good knowledge of Linux and Windows
- Scripting with Bash or PowerShell
- Good to excellent knowledge of at least one object-oriented language, preferably C#
- Experience with Git

### Advantages / Nice to have

- Ability to build and run Docker containers
- Basic knowledge of network structures
- Experience with Microsoft Azure or AWS

### What we offer

### Hiring organization

Fischer & Consultants

### Beginning of employment

Starting immediately

### Job Location

Fleethörn 7, 24103, Kiel, Deutschland

### Date posted

15. July 2026

- In-depth insight into the world of software development and consulting through active participation in real projects with client contact
- Structured onboarding into demanding projects and continuous further training for you
- Flat hierarchies and an excellent working environment
- Independent and autonomous work
- Flexible working hours and mobile work/home office options
- Continuous company growth and low employee turnover
- Opportunity to transition into a permanent position after graduation
- Company pension scheme upon permanent hire
- Conveniently located and easily accessible office
- Free drinks and fresh fruit provided in the office

**Ready to apply? We look forward to hearing from you.**
